

Free Mobile WIFI is the new Free WIFI
First hotel in Singapore to launch game-changing perk for guests

*Free Mobile WIFI for All Guests,
Royal Plaza on Scotts Singapore*

Singapore, 5 December 2018 – Comparing the best deals for travel data packages or trying to tap on free WIFI at every seemingly-dubious hotspot will be a thing of the past for guests of Royal Plaza on Scotts Singapore, starting January 2019.

Asia Pacific's Best Independent Hotel (newly-inducted to TTG Travel Awards Hall of Fame 2018), Royal Plaza on Scotts Singapore (RP), tops guests' expectations by enhancing their travel experience beyond the hotel room with the introduction of free unlimited data on pocket WIFI devices. Having a personal

mobile hotspot means that all guests get to enjoy connection on their own devices for easy access to information, contacts and favourite apps, minus the hassle of using and adapting to foreign devices.

Partnering with Yogofi by Passpod, RP is the first hotel in Singapore to launch the game-changing benefit with pocket WIFI devices that store enough juice to last up to 15 hours per charge. The powerhouse connects up to five devices at high speed every day so guests are never left stranded without internet connection.

“Getting connected and staying connected are so important that travellers plan ahead to order travel sim cards or book pocket WIFI devices before their trips. Wayfinding, updating social media and being connected on messaging apps are deeply integrated into our lives. It is not a luxury to stay connected but a necessity to do so. It’s a paradox that modern travellers are subjected to high costs for a quintessential, in monetary terms and also the investment of effort to find the best value travel data package in the market. Having pocket WIFI devices with unlimited data at our guests’ fingertips takes off some stress from travelling (whether it’s for setting up a business appointment or booking a ride to get around) and that’s what RP’s hospitality is about,” said Mr Patrick Fiat, General Manager and Chief Experience Officer (CEO) of RP.

Residents of the hotel’s sister property, 8 on Claymore Serviced Residences (8oC), enjoy the same perk from January 2019, for those who are here for long-term stays.

Visiting Singapore? Just ensure that “Roaming” is off for mobile data and surf to your heart’s content when staying with RP and 8oC.
